

**PETROLEUM
FACTS and FIGURES
NINTH EDITION**

**AMERICAN PETROLEUM INSTITUTE
50 West 50th Street • New York 20, N. Y.**

FOREWORD

The countless contributions of petroleum to our daily lives, its impact upon our nation's economy, and its importance in national defense were undreamed of when the first oil well was completed near Titusville, Pa., on August 27, 1859. The tremendous growth of this vigorous competitive industry makes it important to have available, in one volume, as many facts and figures about the industry as possible.

The ninth edition of *Petroleum Facts and Figures* is presented to meet that need. Every effort has been made to provide complete and accurate information on the industry—both current facts and as many historical data as the records yield. This publication supersedes previous editions. Its purpose is to serve as an authoritative reference work for oil men, students, educators, journalists, economists, and all others who have an interest in petroleum.

The spirit of petroleum is reflected in the records of accomplishment contained in this volume. Just as these records are the result of the efforts of the millions of men and women who have played their part in the industry, so is this volume the result of the helpful cooperation of many people. Credit lines beneath each table indicate the source of the data, but we would be remiss if we did not offer heartfelt appreciation to all who have helped to make this volume possible.

Any comments or suggestions for additional information which could be incorporated in future editions are welcome.

Frank M. Porter

President

TABLE OF CONTENTS

● UTILIZATION.....	1
● PRODUCTION.....	119
● REFINING.....	215
● TRANSPORTATION.....	267
● MARKETING.....	317
● PRICES AND TAXATION.....	363
● GENERAL.....	417
Labor • Safety • Fire Loss	
Finance • World • Miscellaneous Statistics	
● AMERICAN PETROLEUM INSTITUTE ORGANIZATION.....	468
● CLASSIFIED CROSS-INDEX.....	477
In addition to the index, preceding each section there is a table of contents which lists the tables and page numbers.	

NOTE: Footnote (1) is used throughout the book to indicate a preliminary figure.

U. S. sales of liquefied petroleum gas, by years, 1922-1949.....	76
Utilization of U. S. petroleum asphaltic products, by uses and by years, 1925-1948	77
Sales of petroleum asphalt at U. S. refineries, by years, 1910-1949.....	79
Petroleum road-oil sales by U. S. refineries, by years, 1920-1949.....	80
U. S. sales of carbon black, by uses and by years, 1929-1948.....	81
U. S. motor-vehicle registrations, by years and by types of vehicles, 1900-1949...	82
U. S. motor-vehicle registrations, by states and by years, 1914-1950.....	83
Publicly owned vehicles in the United States, 1949.....	89
Motor-vehicle production and use, by years.....	91
Average consumption of motor fuel by U. S. motor vehicles, by years, 1922-1949..	92
Tractors on U. S. farms.....	93
Petroleum fuels consumed by tractors on U. S. farms, by years, 1940-1950.....	95
U. S. sales of tractors and numbers in use on U. S. farms, by years, 1929-1950....	95
U. S. motor-fuel consumption by aircraft.....	96
U. S. lubricating-oil consumption by aircraft, by years, 1932-1949.....	96
U. S. consumption of fuel and lubricants in civil flying, by years, 1926-1948.....	97
U. S. consumption of fuel and lubricants in scheduled air-carrier operations, by years, 1926-1949.....	97
U. S. sales of domestic oil burners and number in use, by years, 1921-1950.....	98
U. S. sales of commercial and industrial oil burners and number in use, by years, 1935-1950.....	98
U. S. shipments of petroleum-fueled domestic cooking and heating stoves, 1944-1949	99
U. S. automatic domestic central-heating equipment in use, by years, 1931-1950..	99
U. S. sales of automatic domestic central-heating equipment, by years, 1930-1949.	100
Analysis of distribution of vaporizing pot-type central-heating plants, by states....	101
Analysis of distribution of vaporizing pot-type space heaters, by states.....	102
Analysis of distribution of vaporizing pot-type water heaters, by states.....	103
Analysis of distribution of vaporizing pot-type floor furnaces, by states.....	104
U. S. consumption of fuel oils by public utilities, by years, 1930-1949.....	105
U. S. consumption of petroleum and coal fuels in the generation of electric power, by years, 1935-1949.....	105
U. S. consumption of petroleum and solid fuels in the manufacture of gas, by years, 1919-1949.....	106

Table	Page
Manufactured gases produced and purchased by U. S. gas utilities, by types of gas and by years, 1932-1949.....	107
U. S. bunkering of vessels in international trade, by customs districts, 1938-1949...	108
U. S. bunkering of vessels in international trade, by years, 1929-1949.....	109
Consumption of petroleum products by U. S. class I railroads, by type of product and by years, 1924-1949.....	110
Number of locomotives in service at end of year, 1938-1949.....	110
U. S. fuel purchases and fuel costs of Class I steam railways, by types and by years, 1941-1949.....	111
U. S. diesel locomotive units in service on Class I railways, by types and by years, 1937-1948.....	112
Number of locomotives ordered in United States, by types and by years, 1929-1949.	112
U. S. diesel-engine production and use, by years, 1915-1949.....	113
U. S. motor-boat registrations.....	114
Fuels consumed at U. S. refineries, by years, 1925-1948.....	115
Petroleum used in U. S. wood preserving, by years, 1924-1949.....	116
Principal U. S. Army uses of major petroleum products in the continental United States.	116
U. S. annual energy supply from mineral fuels and water power, by years, 1889-1949.....	117
U. S. percentage of total equivalent British thermal units contributed by mineral fuels and water power, by years, 1899-1949.....	118

Use of Petroleum Products at All-Time High in U. S.

1 Preliminary.
 2 Prior to 1932 the Bureau of Mines did not report separately gas oil, distillate fuel oils, and residual fuel oils.
 3 No breakdown of domestic demand by products is available prior to 1931 for other than liquid petroleum products. Aviation gasoline is included with motor fuel from 1920-1949.

¹ Preliminary, subject to material revision.

² Compiled by Department of Statistics, American Petroleum Institute, from reports of various state government departments in an attempt to show the distribution of total motor-fuel demand by states. The total approaches, but does not equal, the U. S. domestic demand reported by the Bureau of Mines. See footnote 5.

³ Not available.

⁴ Iowa includes government use and shrinkage, 1945 only.

⁵ Total domestic demand for motor fuel reported by the Bureau of Mines, from refinery-production, stock, import, and export data. These figures should be used for total U. S. motor-fuel demand.

⁶ In 1938 the Public Roads Administration began issuing a detailed report of motor-fuel consumption by states and uses, based on state taxation and other reports, but built up by some estimates so as to approach, as nearly as possible, total motor-fuel consumption in the United States for all uses. Breakdown by states and uses from these reports is given in table "Analysis of motor-fuel use, by states." The large disparity between the PRA totals and those of the Bureau of Mines and American Petroleum Institute in recent years is due mainly to the varying amounts of aviation gasoline included.

Authority: American Petroleum Institute.

U. S. Motor-Fuel Consumption in 1949—2 Billion Gallons Above Year Earlier

¹ Preliminary.

² Compiled by Department of Statistics, American Petroleum Institute, from reports of various state government departments in an attempt to show the distribution of total motor-fuel demand by states and months. The total approaches, but does not equal, U. S. domestic demand reported by the Bureau of Mines.

Authority: American Petroleum Institute.

U. S. MOTOR-FUEL CONSUMPTION, BY STATES AND MONTHS, 1948²

¹ Preliminary.

² As nearly as possible, this is the total amount of fuel oil used for space heating in automatic-power oil burners. Beginning with 1941, the Bureau of Mines has published these figures by grades No. 1 through 6.

Authority: Bureau of Mines.

¹ Preliminary.

² Includes gas oil, distillate fuel oils, and residual fuel oils.

³ U. S. demand includes the entire demand of the U. S. armed services, regardless of whether demand occurs in foreign countries.

⁴ Exports include lend-lease.

Authority: Bureau of Mines.

Domestic Market Takes 74 Per Cent of Total Sales of Lubricating Oils and Greases in 1947

Exports ⁵

² Exclusive of road oil.

³ Differ from exports reported elsewhere in this edition mainly because of differences in times of collection.

⁴ Not separated prior to 1939.

⁵ Includes waterproofing.

Authority: Bureau of Mines.

² Refiners' sales include receipts from other sources (imports of lake asphalts) and include exports through 1939; they exclude consumption at refineries, transfers, losses, etc.; hence these data are not strictly comparable with data on asphalt demand published in other places in this volume.

³ Figures after 1939 do not include exports.

⁴ Figures include road oil.

¹ Preliminary.

² Reported as sales by refiners, includes exports through 1939, transfers to road oil, and excludes refinery consumption, transfers, losses, and adjustments; hence figures are not comparable with total and domestic demand data given in other places in this volume.

³ Converted from barrels to short tons at the rate of 6 bbl per short ton.

⁴ During 1943 and 1944, and until August 22, 1945, the Petroleum Administration for War prohibited the use of road oil; hence the figures for this period refer to a material more properly classed as "liquid asphalt."

⁵ Figures after 1939 do not include exports.

⁶ Estimated.

Authority: Bureau of Mines.

1902.....	23,000	23,000	23,000
1901.....	14,800	14,800	14,800
1900.....	8,000	8,000	8,000

² Includes taxicabs in all but one state. For details, see table "U. S. motor-vehicle registrations, by states."

³ Includes other types of vehicles in a few states.

⁴ Federal, state, county, and municipal motor vehicles; data partly estimated. No data prior to 1924.

⁵ Data on federal vehicles not available. Figures on other publicly-owned vehicles are incomplete. Some states report state-owned vehicles only. Others exclude certain classes from registration—such as fire apparatus and police vehicles.

⁶ Figures prior to 1924 do not include publicly-owned vehicles, as data are not available.

Authority Bureau of Public Roads; Public Roads Administration

All States Report Record 1950 Motor-Vehicle Registrations

² Conversion, boiler-unit, and furnace-unit installations in household central-heating systems. In addition there are approximately 6,000,000 oil-burning space heaters and approximately 4,000,000 gas-burning space heaters in use.

³ Includes some small commercial coal stokers.

Authority: Fueloil and Oil Heat.

Oil-Burner Sales Reflect Public Preference for Oil Heat

U. S. SALES OF AUTOMATIC DOMESTIC CENTRAL-HEATING EQUIPMENT,² BY YEARS, 1930-1949

¹Light oil is inferred to be gas oil and distillate fuel oils; see table entitled "U. S. consumption of fuel oils by public utilities."

²Heavy oil is inferred to be residual fuel oils.

³Includes bench and producer fuel.

⁴Not available.

Authority: American Gas Association

MANUFACTURED GASES PRODUCED AND PURCHASED BY U. S. GAS UTILITIES, BY TYPES OF GAS AND BY YEARS, 1932-1949

(Millions of Cubic Feet)

¹ Preliminary.

² All purchases of these petroleum products by class I railroads are included, whether for train service or some other purpose. Purchase data not available prior to 1936.

³ Quantities actually consumed in yard switching, road freight, and road passenger service.

Authority: Interstate Commerce Commission.

² This table gives the cumulative total of undocumented vessels numbered under the provisions of the act of June 7, 1913, as amended (46 U. S. C. 288), in each Coast Guard district by Customs ports for the quarter ending March 31, 1950. Generally speaking undocumented vessels are those machinery-propelled vessels of less than 5 net tons engaged in trade which by reason of tonnage are exempt from documentation. They are also those motorboats and motor vessels of 5 net tons and over used exclusively for pleasure purposes which are not documented as yachts or those of less than 5 net tons which by reason of tonnage, are not entitled to be so documented.

Authority: U. S. Coast Guard.

FUELS CONSUMED AT U. S. REFINERIES, BY YEARS, 1925-1948

(Oil and acid sludge, thousands of barrels; coal and petroleum coke, thousands of short tons;
natural and refinery gas, millions of cubic feet; purchased electricity, thousands of kilowatt hours;
total Btu, billions; crude oil run to stills, thousands of barrels)

¹ Preliminary.

² The unit heat values employed are: anthracite, 12,700 Btu per lb; bituminous coal and lignite, 13,100 Btu per lb; crude oil, 5,800,000 Btu per bbl; natural gas, 1,075 Btu per cu ft. Water power includes installations owned by manufacturing plants and mines, as well as government and privately owned public utilities. The fuel equivalent of water power is calculated from the kilowatt-hours of power produced whenever these data are available; the same is true for all public-utility plants since 1919. Otherwise the fuel equivalent is calculated from the reported horsepower of installed water wheels—assuming a capacity factor of 20 per cent for manufacturers and mines, and 40 per cent for public utilities.

³ Fuel equivalent is calculated by assuming the average central-station practice for each of the years for which data are available.

⁴ Data not available.

Authority: Bureau of Mines.

PRODUCTION

PRODUCTION

NOTE Footnote (1) is used throughout the book to indicate a preliminary figure

Table	Page
Miscellaneous petroleum statistics, 1920-1949.....	119
Miscellaneous petroleum statistics.....	120
Drilling operations and average price of crude oil in United States, 1906-1949... 121	121
U. S. geophysical and core-drilling operations, averages.....	122
U. S. crude-oil exploration, discovery, and production, 1937-1949.....	122
Classification of exploratory wells.....	123
Oil, gas, and condensate wells and dry holes drilled in the United States as exploratory tests in 1949.....	124
Number of exploratory holes drilled in the United States, by states and by classes, 1949.....	125
U. S. total and percentage exploratory drilling by classes, 1947, 1948, and 1949..	126
Relative success of U. S. exploratory drilling, 1944-1949.....	126
Statistics on U. S. exploratory drilling, by classification and by years, 1938-1949..	127
Number of wells completed and number of wells producing, by major areas of the United States, 1918-1949.....	128
U. S. drilling activity, by years.....	130
U. S. producing oil wells, by states (number of producing wells as of December 31)..	131
U. S. producing oil wells, by states (average production per well per day).....	132
U. S. producing oil wells, by states and by types, December 31, 1939-1949.....	133
Drilling rigs in use in the United States, by years and by months, 1938-1949.....	135
Drilling rigs in use in the United States during 1949 (state or district), by months....	136
U. S. well-depth records, by states and districts.....	138
Deepest U. S. tests and producing wells, by years.....	139
Average footage of new wells drilled, by states, 1936-1949.....	140
U. S. natural-gas wells, by states.....	141
National stripper-well survey, by states.....	142
National stripper-well survey, January 1, 1950.....	144
Crude-oil production, by states, 1859-1949.....	145
Crude oil produced by principal states, 1910-1949.....	150
U. S. production of crude oil, by state and rank.....	151
Crude oil produced in the United States, by regions, 1859-1949.....	152
Crude oil produced in the United States, by regions, 1859-1949 (barrels per day)..	154
Pennsylvania-grade crude oil produced, by years and states.....	156
Production in leading U. S. oil fields.....	156
Annual and cumulative production of onshore wells in tideland oil fields in the state of California, by years, 1933-1948.....	158
Annual and cumulative production of offshore wells in tideland oil fields in the state of California, by years, 1933-1948.....	158
Tideland oil fields in the state of California.....	159
U. S. crude-oil stocks, by years.....	160
Index numbers of U. S. mineral production.....	161
Value of mineral production in leading U. S. oil states, 1947-1948.....	162
Value of U. S. mineral production, by years.....	163
Value, at the well, of crude oil produced, 1900-1948.....	164
Average price of a barrel of crude oil at the well, 1900-1948.....	168
U. S. gross production of natural gas, by years.....	172
U. S. gross production of natural gas, by states, 1940-1948.....	173

(Continued on next page)

<i>Table</i>	<i>Page</i>
Marketed production of natural gas in Appalachian and North Central areas, 1906-1948.....	177
Marketed production of natural gas in Mid Continent, Gulf Coast, Rocky Mountain, and California areas, 1906-1948.....	178
Marketed production of natural gas, by areas, 1906-1948.....	180
Annual crude-oil reserves and discoveries in the United States.....	182
Estimated proved reserves of crude oil in the United States.....	183
Estimated proved reserves of natural-gas liquids in the United States.....	184
Estimated proved reserves of liquid hydrocarbons in the United States.....	185
Estimated proved recoverable reserves of natural gas in the United States.....	186
Estimated proved recoverable reserves of natural-gas liquids in the United States..	187
Composite proved petroleum reserves, by states.....	188
Summary of API reserves committee's annual reports covering period 1937-1949..	189
Areas of world classified as to future prospects for oil.....	190
New oil, gas, and distillate fields and pay horizons found annually in the United States, 1937-1949.....	191
Production of crude oil on U. S. government lands, by years.....	191
Production of natural gas on U. S. government lands, by years.....	192
Production of natural gasoline on U. S. government lands, by years.....	192
Production of crude oil, natural gas, and natural gasoline on U. S. government lands—1949.....	193
Production of crude oil, natural gas, and natural gasoline on U. S. government lands—1948.....	193
Oil- and gas-well activity on U. S. government lands, 1949.....	194
Oil- and gas-well activity on U. S. government lands, 1948.....	195
Status of wells on U. S. government lands, by states, 1949.....	196
Status of wells on U. S. government lands, by states, 1948.....	197
U. S. income from crude oil, natural gas, and natural gasoline on government lands, by states, 1949.....	198
U. S. income from crude oil, natural gas, and natural gasoline on government lands, by states, 1948.....	199
U. S. income from crude oil, natural gas, and natural gasoline on government lands, by years.....	200
Royalty, bonus, and rental payments to Osage Indians, by years, 1901-1950....	201
U. S. natural-gasoline plant operations, by years, 1911-1948.....	202
U. S. production of natural gasoline, by states, 1941-1948.....	203
Value of U. S. production of natural gasoline, by states, 1941-1948.....	203
Number of U. S. natural-gasoline plants, by states, 1930-1950.....	204
Daily capacity of natural-gasoline plants in the United States, as of January 1, 1930-1950.....	205
Number and daily capacity of U. S. natural-gasoline plants, by years, 1928-1950..	206
U. S. production and value of cycle products, by states, 1945-1948.....	206
U. S. production and value of liquefied petroleum gas, by states, 1945-1948....	207
U. S. production of liquified petroleum gas and cycle products, by states, 1941-1948.	207
Value of U. S. production of liquefied petroleum gas and cycle products, by states, 1941-1948.....	208
U. S. production of natural gasoline and cycle products, by states and by years, 1911-1948.....	209
Value of natural gasoline and cycle products at U. S. plants, by states, 1911-1948..	211
U. S. supply of and demand for natural gasoline, by years.....	213

Petroleum Industry Grows to Meet Rising Demand for Its Products

MISCELLANEOUS PETROLEUM STATISTICS, 1920-1949

Year	Production			Pipe-Line Transportation		Refining		Marketing	
	Number of Wells Drilled	Number of Wells Producing	Crude Oil Produced (Thousands of Barrels)	Miles of Pipe Lines in Operation	Crude Oil Moved by Pipe Lines (Thousands of Barrels)	Crude-Oil Runs to Stills (Thousands of Barrels)	Motor Fuel Produced (Thousands of Barrels)	Domestic Motor-Fuel Demand (Thousands of Barrels)	Number of Vehicles Served (Thousands)

CLASSIFICATION OF EXPLORATORY WELLS

	I. Classification when Drilling is started		II. Classification after Completion or Abandonment	
	A		Successful	Unsuccessful
Drilling for a new pool on a structure or in a geological environment already productive	New-pool tests	1	1	1
		Outpost (Extension test)	Extension well (Sometimes a new-pool discovery well)	Dry outpost (Dry extension test)
		2a	2a	2a
		Shallower-pool test	Shallower-pool discovery well (Sometimes shallower-pool extension well)	Dry shallower-pool test
Drilling for a new pool on a structure or in a geological environment already productive	New-pool tests	2b	2b	2b
		Deeper-pool test	Deeper-pool discovery well (Sometimes deeper-pool extension)	Dry deeper-pool test
		2c	2c	2c
		New-pool wildcat	New-pool discovery wildcat (Sometimes an extension well)	Dry new-pool wildcat
Drilling for a new field (on a structure or in an environment never before productive)	New-pool tests	3	3	3
		New-field wildcat	New-field discovery wildcat	Dry new-field wildcat

¹ Preliminary.
² Estimated Kentucky production, 1860-1882, 161,000 bbl.
³ Estimates included with Kentucky, 1876-1907, inclusive.
⁴ Less than 500 bbl.
⁵ Michigan shown with Missouri, 1900-1911.
⁶ Figures for Oklahoma and Kansas for years 1905-1906 shown together by *Mineral Resources* (U. S. Geological Survey) were divided by and of *Petroleum in the United States and Possessions*, by Arnold and Kennitzer.
⁷ Included under "unclassified."
⁸ Kentucky and Tennessee figures in years 1916 through 1918 obtained from *Mineral Resources and Petroleum in the United States and Possessions*. In 1921 through 1923, Alaska, Missouri, and New Mexico; 1920, Alaska, Michigan, Missouri, and New Mexico; 1912, Alaska and Michigan; 1913, Alaska, Michigan, Missouri, and New Mexico; 1914 through 1916, Alaska, Michigan, and Missouri; 1917 through 1919, Alaska, Michigan, Missouri, and New Mexico; 1924 through 1931, Alaska and Utah; 1932, Alaska, Missouri, and Utah; 1933, Alaska, Mississippi, Missouri, and Utah; 1934, Mississippi, Missouri, and Utah; 1935, Mississippi, Missouri, Tennessee, and Utah; 1936 through 1938, Missouri, Tennessee, and Utah; 1939, Florida and Virginia; 1944 through 1949, Alabama, Florida, and Virginia.
⁹ Pennsylvania and New York separated in years 1864 through 1881 by aid of *Petroleum in the United States and Possessions*, by Arnold and Kennitzer. In addition, the following estimates which are not shown by the official *Mineral Resources*: Ohio, 1860 through 1875, 200,000 bbl; West Virginia, 1860 through 1875, 2,800,000 bbl.
¹⁰ New York included with Pennsylvania.
¹¹ Insignificant production of Utah (mostly used as fuel) shown with Wyoming.
¹² Figures on average price per barrel for years 1859 through 1875 taken from *Petroleum in the United States and Possessions*, by Arnold and Kennitzer; remainder from *Mineral Resources and Minerals Year Book*.
¹³ Figures on average price per barrel for years 1859 through 1875 taken from *Petroleum in the United States and Possessions*, by Arnold and Kennitzer; remainder from *Mineral Resources and Minerals Year Book*.
¹⁴ Utah production estimated at 3,650 bbl in 1859; 3,126 bbl in 1940; and 189,726 bbl cumulative through 1940.
¹⁵ "Other States" includes: 1912, Alaska and Michigan; 1913, Alaska, Michigan, Missouri, and New Mexico; 1920, Alaska, Michigan, Missouri, and New Mexico; 1921 through 1923, Alaska, Missouri, and New Mexico; 1924 through 1931, Alaska and Utah; 1932, Alaska, Missouri, and Utah; 1933, Alaska, Mississippi, Missouri, and Utah; 1934, Mississippi, Missouri, and Utah; 1935, Mississippi, Missouri, Tennessee, and Utah; 1936 through 1938, Missouri, Tennessee, and Utah; 1939, Florida and Virginia; 1944 through 1949, Alabama, Florida, and Virginia.
¹⁶ Little production, but no record available.

Authority, Bureau of Mines

Texas Produces 40 Per Cent of Nation's Oil

CRUDE OIL PRODUCED, BY PRINCIPAL STATES, 1910-1949¹

¹ Preliminary

² Regions indicated in this table and all others in the production section are those of the Bureau of Mines. Appalachian includes New York, Pennsylvania, West Virginia, and eastern Ohio. California includes California only. Lima-Indiana includes northwestern Ohio, northeastern Indiana, and Michigan. Illinois includes all of Illinois and southwestern Indiana. Mid Continent includes Kansas, Oklahoma, northwestern Texas, northern Louisiana, Arkansas, Mississippi, and southeastern New Mexico. Gulf includes gulf coastal plain of Texas and Louisiana.

³ Southwest Indiana excluded after 1918. Includes Michigan after 1919.

⁴ Includes Alaska, 1924-1934.

⁵ Southwest Indiana included after 1918.

⁶ Alaska, Missouri, and New Mexico.

⁷ Alaska, Arkansas, Missouri, New Mexico, and Utah.

⁸ Alaska and Michigan.

⁹ Alaska, Michigan, and Missouri.

¹⁰ Alaska, Michigan, Missouri, and New Mexico.

¹¹ Michigan and Missouri.

² Fields with estimated ultimate production of 100,000,000 bbl or more.

³ Rank is indicated for the 23 fields only which in 1949 had a production of 10,000,000 bbl. Scores of fields not listed in this table had a production in 1949 ranging from 1,000,000 bbl to 10,000,000 bbl.

² Prior to Jan. 1, 1924, stocks included non-refinable heavy crude in California; subsequently these stocks were removed from crude-storage data by transfer to residual fuel-oil stocks.

³ These Jan. 1 stock figures are revisions of previous Dec. 31 data so as to account for transfers and other previously unrecorded stock changes. Figures at beginning and end of each year are comparable.

⁴ Includes all stocks of crude oil in the United States. Beginning with Jan. 1, 1948, the heavy crude inventories in California, previously classified as part of the inventories of heavy fuel oil, have been reclassified and transferred to crude, and are included in these tabulations as crude oil.

Authority. Bureau of Mines.

¹ Preliminary.

² Apparent discrepancy between totals in this table and those in table entitled "Value of mineral production in leading U. S. oil states" results from the fact that here the total in some instances includes values at the smelter and refinery; whereas in the aforementioned table the total represents value at the mine or well.

³ Crude oil, natural gas, and natural gasoline are included in the value of non-metallic minerals.

⁴ Value at point of consumption.

⁵ Includes liquefied petroleum gas, condensate, kerosine, distillate, "special" naphtha, toluene, etc.

Authority Bureau of Mines.

Value of Crude-Oil Production Double That of 1946

² Mississippi and Missouri through 1939. Mississippi only from 1940.

³ Included with Oklahoma.

⁴ Tennessee prices for this and previous years included with Kentucky.

Authority Bureau of Mines; U S Geological Survey

Ultimate Recovery of Petroleum Boosted by Natural-Gas Repressuring

U. S. GROSS PRODUCTION OF NATURAL GAS, BY YEARS

(Millions of Cubic Feet)

² Marketed production plus quantities used in repressuring, stored in ground, lost, and wasted [see footnote (4)].

³ Marketed production by state of production. Includes exports, excludes imports; hence figures differ somewhat from marketed production by state of consumption, for which see table "U. S. natural-gas consumption." On new basis after 1947; includes gas stored and lost in transmission.

⁴ Losses include residue gas blown to the air and shrinkage at natural-gasoline plants, and transportation losses; losses on producing properties not included except when the data are available.

Authority: Bureau of Mines.

Marketed Production of Natural Gas Shows Steady Rise

¹ Preliminary.

² Marketed production plus quantities used in repressuring, stored in ground, lost, and wasted (see footnote 4).

³ Marketed production by state of production. Because of imports and exports, these figures differ slightly from figures of marketed production by state of consumption elsewhere in this volume. Beginning with 1947, marketed production reported on a new basis; includes gas stored and lost in transmission.

⁴ Includes gas (mostly residue) blown to the air, but does not include direct waste on producing properties except when the data are available.

⁵ Other states include: Florida, North Dakota, South Dakota, Tennessee, Utah, and Virginia for 1943 through 1948; North Dakota, South Dakota, Tennessee, Utah, and Virginia in 1942, North Dakota, South Dakota, Tennessee, Utah, Virginia, and Washington in 1940 and 1941.

⁶ Includes gas transported from other states.

¹ Preliminary.

² Beginning with 1947, marketed production on new basis; see footnote 2 of table "U. S. gross production of natural gas, by states," includes Alabama and Texas from 1906 through 1910, and Alabama only from 1911 through 1914.

³ Includes with Louisiana up to 1911.

⁴ Included with Louisiana up to 1911.

⁵ Not available separately prior to 1918.

² Accumulated production to Dec. 31 plus proved reserves as of Dec. 31.

³ Figure for 1936 is estimate of *The Lamp* [Standard Oil Co. (New Jersey)]; all others from 1935 are estimates of the American Petroleum Institute's Committee on Petroleum Reserves. Figures for years prior to 1935 are estimates of the API Department of Statistics, but are not based on geological surveys.

⁴ Prior to 1937, Bureau of Mines; beginning with 1937, figures are those of API Committee on Petroleum Reserves.

⁵ Beginning with 1946 API report, reserves are for crude oil only. These are comparable figures for end of 1945 on that basis. Prior figures of API Committee on Petroleum Reserves included some condensate.

¹ Includes Alabama, Florida, Maryland, Missouri, Nebraska, and Virginia.

² Excludes gas loss due to recovery of natural-gas liquids.

³ The net difference between gas stored in and gas withdrawn from underground storage reservoirs.

⁴ Net production equals gross withdrawals less gas injected into underground reservoirs; changes in underground storage are excluded. December production estimated occasionally.

⁵ Non-associated gas is free gas not in contact with crude oil in the reservoirs.

⁶ Associated gas is free gas in contact with crude oil in the reservoirs.

⁷ Dissolved gas is gas in solution with crude oil in the reservoirs.

⁸ Gas held in underground reservoirs for storage purposes only.

Authority: American Gas Association

1945.....	1,690,315,000	419,984,000	2,110,299,000	1,736,717,000	20,826,813,000	373,582,000
December 31, 1945 Estimated Proved Reserves of Crude Oil Only (see note below).....					19,941,846,000

NOTE: Up to and including its figures on proved reserves of petroleum, as of December 31, 1945, the API reserves committee combined under that heading the estimated proved reserves of cycle-plant and lease condensate. As of December 31, 1945, the reserves so included totaled 884,967,000 bbl and, as of December 31, 1944, there were 668,701,000 bbl included. Beginning with the report of December 31, 1946, the figures in this table show crude oil and natural-gas liquids. It is to be remembered that, previous to December 31, 1946, not all classes of natural-gas liquids were included. For this reason the totals for crude oil and natural-gas liquids, as herewith recorded for 1946 through 1949, are not comparable with the figures recorded for years prior to 1946.

PROVED RESERVES AS REPORTED FOR 1946 AND THEREAFTER

¹ Preliminary.

² Includes propane, butane, and pentane (both normal and iso-), and mixtures of these products.

³ Includes finished gasoline, condensate, kerosene, distillate fuel oils, etc.

⁴ From 1941 through 1944 only 2 states, viz., Louisiana and Texas, reported cycle products. The figures here include Louisiana production (thousands of gallons): 1944—291,654; 1943—153,594; 1942—148,747; 1941—83,869. Texas production: 1944—551,370; 1943—504,252; 1942—506,117; 1941—396,485. Louisiana value (thousands of dollars): 1944—12,835; 1943—5,959; 1942—5,121; 1941—6,183. Texas value: 1944—25,365; 1943—21,268; 1942—19,274; 1941—14,587.

Authority: Bureau of Mines.

¹ Preliminary.

² Wyoming includes Colorado and Utah in 1944.

³ Includes Alaska only.

⁴ Less than \$500.

⁵ Included with "other states."

Authority: Bureau of Mines

¹ Preliminary.

² Beginning with 1941, includes LPG (liquefied petroleum gas) and cycle products. Previous to that, these two items were relatively unimportant, and were only partly included.

³ Includes some benzol blended in recent years.

⁴ Included in shipments to refineries.

⁵ Included in other uses and losses.

Authority: Bureau of Mines

¹ Beginning with 1947, the Bureau of the Census has included, in its petroleum-refining classification, those establishments primarily engaged in refining used oils. Formerly, this classification included only those establishments primarily engaged in producing gasoline, fuel oils, lubricating oils, and other products from crude oil. In order to make 1939 comparable with 1947, reports from rerefiners were retabulated. No separate figures are available for other years.

Authority: Bureau of the Census.

Gasoline Is Leading Petroleum Product

PRODUCTION OF PETROLEUM PRODUCTS IN U. S. REFINERIES, BY YEARS, 1918-1949

(Thousands of Barrels)

¹ Preliminary.

² Refinery districts here used are those of the Bureau of Mines.

³ Crude runs in Texas Inland and Texas Gulf Coast districts have been combined.

⁴ Revised. California figures on new basis to agree with 1949; includes heavy crude previously considered as non-refinable fuel oil; 1947 and prior years on old basis.

⁵ Includes all of Arkansas and Louisiana.

⁶ Not available.

Authority: Bureau of Mines.

U. S. Refinery Activity Heavy Throughout 1949

1916.....	6,950 ⁴	49,021

¹ Preliminary.

² Natural gasoline blended and run through pipe lines. In recent years natural gasoline has included other light products such as cycle products.

³ In 1925 and prior years, breakdown of cracked and straight-run gasoline are estimated figures.

⁴ Estimates of cracked-gasoline production; no other breakdowns available.

⁵ Since 1946 the Bureau of Mines no longer reports gasoline by distillation and by cracking; now reported as refinery gasoline and naphtha.

Authority: Bureau of Mines.

U. S. 1949 Motor-Fuel Production Meets Highest Demand in History

² Capacity reported on new basis in 1938 and subsequent years. Shutdown capacity includes capacity of inoperative portions of operating plants as well as capacity of plants completely shut down. Capacity of facilities under construction includes the capacity of construction to augment existing plants as well as new plants.

³ Old basis, comparable with previous years. Shutdown capacity includes only capacity of plants completely shut down. Capacity of facilities under construction includes only that of new plants in process of erection—not additions to existing plants.

⁴ "Shutdown" plants are included with "operating."

Authority: Bureau of Mines.

^a Data for the years 1918 through 1941, and for 1946 through 1949, are from the Bureau of Mines. Because the Bureau of Mines discontinued its refinery survey from 1942 through 1945, the data for these years are from the *Oil and Gas Journal*.

^b Includes Idaho.

^c As of May 1, 1925.

^d As of Nov. 1, 1924. No data available for 1922 and 1923.

Authority: See footnote (2).

U. S. Cracking Capacity Doubles Since 1938

SUMMARY OF U. S. CRACKING PLANTS, BY YEARS, 1925-1950¹

Year	Capacity (Barrels Per Day)			
	Operating	Shutdown	Total Operating and Shutdown	Building
Jan. 1, 1950	1,732,241	88,442	1,820,683	94,045
Jan. 1, 1949	1,638,783	76,490	1,715,273	136,602
Jan. 1, 1948	1,556,958	67,200	1,624,158	172,200
Jan. 1, 1947	1,412,814	101,808	1,514,622	80,000
Jan. 1, 1946	1,386,162	113,613	1,499,775	57,870
Jan. 1, 1945	1,439,226	48,688	1,487,914	14,100
Jan. 1, 1944	1,236,343	50,102	1,286,445	189,244
Jan. 1, 1943	1,117,533	71,810	1,189,343	155,984
Jan. 1, 1942	1,144,594	49,105	1,193,699	28,985
Jan. 1, 1941	1,021,006	82,042	1,103,048	48,145
Jan. 1, 1940	964,665	81,549	1,046,214	58,075
Jan. 1, 1939	877,347	119,152	996,499	47,180
Jan. 1, 1938 ²	853,161	79,810	932,971	86,080
Jan. 1, 1937	2,077,325	139,525	2,216,850	138,220
Jan. 1, 1936	1,994,868	215,450	2,210,318	30,450
Jan. 1, 1935	1,997,778	311,491	2,209,269	20,000
Jan. 1, 1934	1,712,629	377,735	2,090,364	59,300
Jan. 1, 1933	1,580,051	417,694	1,997,745	33,650
Jan. 1, 1932	1,603,809	394,585	1,998,394	48,587
Jan. 1, 1931	1,594,990	244,661	1,839,651	111,130
Jan. 1, 1930	1,419,200	139,840	1,559,040	149,900
Jan. 1, 1929	1,194,501	147,923	1,342,424	134,450
Jan. 1, 1928	1,013,000	253,000	1,266,000	22,000
June 1, 1926	844,800	47,690	892,490	47,600
June 1, 1925	690,492	26,200	716,692	116,000

² Beginning Jan. 1, 1938, capacity is expressed in terms of cracked-gasoline production.

² Not including natural-gasoline pipe lines.

³ Except as noted. See footnote 4.

⁴ Breakdown of ICC trunk-line mileage between crude oil and refined oil is given as reported for 1938 on; estimated by API for 1937 and 1936 from ICC data and reports of companies. Not available prior to 1936.

⁵ Believed to cover all petroleum pipe lines, including private carriers not reporting to ICC. Figures starred in these columns were reported by Bureau of Mines as of December 31, 1949, May 1, 1941, June 30, 1936, May 1, 1931, May 1, 1926, and spring of 1924. All other figures estimated as of December 31, by API from ICC data and trade sources.

⁶ Includes only pipe lines reporting to the ICC. Figures for 1921 through 1949 are given as reported by ICC. Figures for years prior to 1921 are from an article by Walter Splawn in *Oil and Gas Journal*, September 27, 1938, and described as "interstate pipe lines"; data for intervening years are given in article.

⁷ Includes private carriers, and believed to cover almost all petroleum pipe lines. See footnotes 4 and 5.

Authority Interstate Commerce Commission; Bureau of Mines; American Petroleum Institute.

¹ Excludes service pipe, which is used for delivering gas from the distribution main to the customer's meter.

² Less than 5 miles.

Authority American Gas Association

U. S. RAILROAD TANK CARS IN SERVICE, BY YEARS, 1942-1950

As of January 1:	Privately-owned	Railroad-owned	Total	In Petroleum Service ²
1950.....	142,964	9,219	152,183	95,000 ³
1949.....	141,819	8,985	150,804
1948.....	137,486	9,042	146,528	102,997 ⁴
1947.....	134,203	9,083	143,286
1946..	138,348	10,158	148,506
1945.....	141,135	10,133	151,268	113,238 ⁴
1944.....	141,290	9,812	151,102	120,560 ⁴
1943.....	140,598	9,438	150,036
1942.....	143,898	8,733	152,631

²Included in total tank cars. Because tank cars are used interchangeably in petroleum, chemical, vegetable-oil, packing-house-products, and similar service, all figures on those in petroleum service are necessarily estimates.

³The Union Tank Car Co. estimates that, on Jan. 1, 1950, approximately 90,000 to 95,000 U. S. tank cars were actually used in petroleum service.

⁴Estimated by Office of Defense Transportation, as of the following dates: Mar. 1, 1948; Mar. 15, 1945; and Jan. 1, 1944.

Authority: Association of American Railroads.

¹ Carload freight only.

² Prior to 1947, "gasoline" was classified as "petroleum oils, refined," which included other refined products. Therefore, the decrease in "gasoline" reflects a transfer of products to a classification of "products, not otherwise specified."

² Shortest distances are shown in all cases. In some cases, longer distances would enable shipper to avoid canal tolls. Singapore is used as a representative shipping point for East Indies petroleum.

³ Via Panama Canal.

⁴ Via Mona Pass.

⁵ Via Suez Canal.

⁶ Via Cape Wrath.

⁷ Via Kiel Canal.

1931.....	179,735,000	9,233,369,320

² Exclusive of Great Lakes.

³ Figures are after elimination of known duplications which result from reporting of identical shipments over two or more waterways. However, figures for 1947 and 1948 represent originated traffic.

⁴ Data compiled under new statistical method originated by the Board of Engineers for Rivers and Harbors. This new method eliminates duplication more thoroughly than in previous years. Therefore, figures appear low as compared with other years.

Authority: Board of Engineers for Rivers and Harbors.

VESSELS ENGAGED IN ALL FREIGHT TRANSPORTATION ON U. S. INLAND WATERWAYS ¹

(As of December 31, 1948)

Type of Vessel	Mississippi River System	Atlantic, Gulf, and Pacific Coasts	Total
Self-propelled—			
Tow boats:			
Number of vessels.....	1,735	2,392	4,127
Horsepower	878,102	881,870	1,759,972
Non-self-propelled—			
Barges and scows, dry cargo:			
Number of vessels.....	4,431	5,377	9,808
Cargo capacity (net tons).....	3,372,259	3,211,664	6,583,923
Tank barges:			
Number of vessels.....	1,419	462	1,881
Cargo capacity (net tons).....	1,575,757	580,289	2,156,046
Total barges and scows:			
Number of vessels.....	5,850	5,839	11,689
Cargo capacity (net tons).....	4,948,016	3,791,953	8,739,969

¹ Includes all inland waterways exclusive of the Great Lakes.

Authority: Board of Engineers for Rivers and Harbors.

¹ Preliminary.
² Includes total exports to foreign countries and shipments to non-contiguous territories such as Alaska, Hawaii, Puerto Rico, Virgin Islands.
³ Does not include shipments to our armed forces for the years 1942-1945.
⁴ Not available.

Authority: Bureau of Mines

¹ Preliminary.

² Included with "miscellaneous products" prior to 1913.

³ Includes paraffin wax, petroleum asphalt, petroleum coke, lubricating greases, mineral spirits, natural gasoline from 1932 through 1949; liquefied petroleum gases, 1936 through 1949; petroleum jelly, 1940 through 1949; natural gas, 1942 through 1949.

⁴ Includes lubricating greases after 1939.

Authority: Bureau of Foreign and Domestic Commerce; Bureau of the Census.

1 Preliminary.

² Does not include imports from U. S. non-contiguous territories, which are included in import totals of the Bureau of Mines.

Principally bonded supplies for vessels.

⁴Topped crude oil in 1939 included inseparably with unfinished distillates; estimated 4,000,000 bbl imported has been subtracted from unfinished distillates, added to residual fuel oil—3,000,000 bbl from domestic, 1,000,000 bbl from bonded.

⁶ Not including wax, petroleum jelly, solid asphalt, and other solid products.

Authority: Bureau of the Census; Bureau of Foreign and Domestic Commerce

Venezuela Supplies Major Portion of U. S. Crude Imports for Two Decades

² Gasoline and lubricating-oil tax collections are included in service-station sales. Service stations increasingly are selling other than petroleum products, and these sales are included in service-station sales. Not included are sales of gasoline and lubricating oils at several thousand secondary outlets not classified as service stations; nor are included non-retail sales to bulk users. In 1929 service stations sold 82.6 per cent of the gasoline and oil sold by all retail outlets; remainder was sold by secondary outlets. Also, of 1929 service-station sales, 85 per cent were gasoline and oil; remainder was other merchandise.

³ Beginning with 1939, these sales have been for "filling stations."

Authority: Bureau of the Census through 1938; 1939 on from *Survey of Current Business*, Department of Commerce.

¹ Preliminary.

² Part of the service-station sales reported in this table is obtained from other than petroleum products, as the Bureau of Census defines a service station as a retail establishment where more than half of dollar sales is derived from petroleum products. Service-station sales also include gasoline and lubricating-oil tax collections.

Authority: Bureau of the Census.

² Gasoline and service-station construction within urban places. Urban, as defined by the Bureau of the Census, covers all incorporated places of 2,500 population or more in 1940 and, by special rule, a small number of unincorporated civil divisions. Building outside of these city limits is excluded.

³ None reported.

Authority: Bureau of Labor Statistics.

1931.....	355	3,884	10,500,297	2,703

² Although building permits (indicating only intention to build) are not always an accurate index of actual construction for some types of buildings, it is believed that almost all service-station permits result in construction. These permits cover incorporated municipalities only; no data or estimates available on service-station construction in non-incorporated areas.

³ For 1939 through 1941, cities over 1,000 population; for 1936 through 1938, and 1942 through 1949, cities of more than 2,500; for 1933 through 1935, cities of more than 10,000; for 1931 through 1932, cities of more than 25,000.

⁴ Maximum number reporting in any month; figures derived from monthly reports, with number of reporting cities ranging from 2,005 to 2,131.

Authority: Bureau of Labor Statistics.

\$132 Million Spent for Gasoline Pumps, 1946-1949

U. S. SALES OF GASOLINE PUMPS, BY YEARS, 1934-1949

¹ Preliminary.

² Work week ended nearest Nov. 15.

³ Average for the year.

⁴ The major classification of petroleum wholesaler is the bulk station and terminal. In 1939 and 1948 data represent wholesale trade in petroleum bulk stations and terminals; 1929 represents total wholesale trade in petroleum products because a fine breakdown by type of wholesaler was not made in that year.

Authority: Bureau of the Census

² 36-deg gravity beginning with 1922; no gravity scale used in pricing prior to that year.

³ Prices 1912 through 1925 apply to the Batson, Saratoga, Spindletop, Humble, and Electra oil fields; Gulf Coast coverage broadened beginning with 1926.

⁴ Prices for 1922 through 1924 apply to 27-deg-gravity crude in fields situated in the Los Angeles Basin. Prices for 27-deg-gravity crude at Signal Hill not available until 1925.

Authority: 1912 through 1923, U. S. Geological Survey; 1924 through 1945, *National Petroleum News*.

² In years when rate changes, highest rate levied during the year is used.

³ Minnesota rate changed from 4 cents to 3 cents effective Sept. 30, 1940, but was restored May 1, 1941; therefore, no change is reflected in the table.

⁴ Includes District of Columbia.

⁵ As of November 1.

Authority: 1919 through 1933, F. G. Crawford, *Motor-Fuel Taxation in the United States*;
1934 through 1950, American Petroleum Industries Committee.

Weighted-average rate ²

¹ The tax rates given were in effect Dec. 31 for all years except 1950. The 1950 tax rates given were in effect November 1.

² The first year in which gasoline taxes were in effect in all states during the entire year was 1930. Weighted averages, based on the net gallons taxed, are shown.

³ Not available.

² Estimated from gasoline consumption and new-car sales by states.

³ Automotive portion of total federal gasoline-tax collections distributed.

⁴ Includes automotive portion of taxable lubricating-oil tax collections; and all manufacturers' excises on automobile and truck chassis and bodies; other automobiles and motorcycles; parts and accessories for automobiles; tires and inner tubes; and motor-vehicle use tax. For distribution of federal lubricating-oil taxes between automotive and industrial uses, see p. 408.

Authority: Calculated by American Petroleum Industries Committee from data of Bureau of Internal Revenue; Bureau of Public Roads.

² Average number of motor vehicles in use is basis of table. See footnote 3.

³ Estimates of automotive motor-fuel demand (Bureau of Mines through 1943; Bureau of Public Roads from 1944 through 1948; American Petroleum Institute for 1949) divided by average number of motor vehicles in use during each year. For breakdown by passenger cars, trucks, and buses, see table entitled "Average consumption of motor fuel by U. S. motor vehicles, by years, 1925-1949."

Authority: Bureau of Public Roads; Bureau of Mines; gasoline-price and tax data gathered and compiled by The Texas Co.; calculations by American Petroleum Institute.

AVERAGE STATE AND FEDERAL TAXES ON PRIVATE AND COMMERCIAL VEHICLES, PER MOTOR VEHICLE— BY STATES, 1949

² Diversions are made from revenues disbursed, rather than from revenues collected. Disbursements differ (but only slightly) from collections, because of time lag in actual distribution of funds, balances from previous years, and other reasons. Also, gasoline taxes and motor-vehicle fees include all revenues collected, such as dealer licenses, fines and penalties, etc.

³ Data not available prior to 1934.

Authority: Bureau of Public Roads.

² Pipe-line companies reporting to the Interstate Commerce Commission.

³ For operating revenues, see table entitled "Operating revenues, expenses, and income, etc., of U. S. pipe-line companies," p. 439.

⁴ Not available.

Authority: Interstate Commerce Commission.

GENERAL

GENERAL

NOTE Footnote (1) is used throughout the book to indicate a preliminary figure

Table	Page
LABOR:	
Employment, earnings, and payrolls of petroleum-industry workers, compared with all manufacturing, 1947-1950.....	417
Employment in petroleum refining and in crude-oil and natural-gas production, by months and years, 1947-1950.....	420
Average weekly earnings in U. S. petroleum production and refining compared with other industries.....	421
Average hourly earnings in U. S. petroleum production and refining compared with other industries.....	422
Average hours worked per week in U. S. petroleum production and refining compared with other industries.....	423
Employment and payrolls of U. S. oil pipe-line companies engaged in interstate commerce, 1921-1949.....	424
Number, occupation, and compensation of employees of U. S. oil pipe-line companies reporting to the Interstate Commerce Commission, 1937-1948.....	425
Employment in the California petroleum industries, 1943-1949.....	427
SAFETY:	
Summary of injuries in the U. S. petroleum industry—	
Number of employees of companies reporting.....	428
Hours worked for reporting companies.....	429
Injury-frequency rate of reporting companies.....	430
Injury-severity rate.....	431
FIRE LOSS:	
Number of properties and fires reported by U. S. petroleum industry for 1949..	432
Number of reported properties, insurable values, fire losses, and fire-loss ratios, by classes of property in the petroleum industry for 1949.....	433
Fire losses reported by U. S. petroleum industry, by years, 1934-1949.....	434
U. S. petroleum-industry fire-loss ratios, by classes of property and by years, 1930-1949.....	434
Fire-loss characteristics of U. S. petroleum-industry properties.....	435
FINANCE:	
Summary of capital expenditures by the U. S. oil industry.....	436
Capitalization of U. S. petroleum-industry pipe-line companies, by years, 1921-1949.....	437
Selected balance-sheet items of U. S. oil pipe-line companies, by years, 1921-1949.....	438
Operating revenues, expenses, and income, and net income of U. S. oil pipe-line companies, by years, 1920-1949.....	439
Investment and depreciation charges of U. S. oil pipe-line companies, by years, 1921-1949.....	440
Operating revenue, operating expense, and investment in carrier property of U. S. oil pipe-line companies, by years, 1929-1949.....	441
Rate of return on net worth.....	442
U. S. oil-lease rentals and royalties paid, by selected years, 1923 to 1949.....	442

(Continued on next page)

Table	Page
WORLD:	
Estimated world crude-oil reserves, 1950 and 1944.....	443
World crude-oil production, by regions and countries—by years, 1911-1949—	
North America.....	444
South America.....	445
Europe.....	446
Africa.....	447
Asia.....	448
World total.....	449
World crude-oil production, by regions and countries—by years, 1857-1910—	
North America and South America.....	450
Europe.....	451
Asia and world total.....	452
Petroleum production in Canada, by fields and by years, 1946-1950.....	453
World refining capacity as of January 1, 1950.....	454
World refining capacity as of January 1, 1941.....	456
World production of major refined-oil products, by countries, 1938 and 1946...	457
Indicated world demand for gasoline, 1946 and 1947, by countries.....	459
World motor-vehicle registrations, by geographic areas and by years, 1924-1950.....	460
MISCELLANEOUS STATISTICS:	
U. S. production of tubular goods for the oil country and for other uses, by types, 1938-1949.....	461
Average octane rating of motor fuel, by years, 1930-1950.....	462
Conversion: gravities and weights for petroleum products.....	463
Representative weights of petroleum products in international trade.....	464
Representative weights of crude oil, by countries of production, in international trade.....	464
Weight conversions.....	465
Volume conversions.....	465
Heat values of clean crude oils.....	465
Heat values of various typical petroleum fuels.....	465
Heat value of representative manufactured and natural gases.....	466
Heat value of representative solid fuels.....	466
Heat value of wood fuels.....	467
Gross heat of combustion of paraffin hydrocarbons.....	467

² From reports of companies constituting an undetermined portion of the petroleum industry, but believed to be representative of the industry.

³ Frequency rate is the number of disabling injuries per 1,000,000 hours worked.

⁴ Severity rate is the number of days lost per 1,000 hours worked.

Authority: American Petroleum Institute; National Safety Council.

NUMBER OF PROPERTIES AND FIRES REPORTED BY U. S. PETROLEUM INDUSTRY FOR 1949 ²

Class of Property	Total Number of Properties Reported to Have Been Owned or Operated	Number of Fires Reported				Frequency Fires Per 100 Properties
		Originated on Oil-Company Properties and:		Originated Outside but Spread to Oil- Company Property	Total Number of Fires	
		Confined to Property	Spread to Other Property

² Data are from reports of companies which constitute an indeterminate portion of the petroleum industry, but are believed representative of the industry.

³ Fire-loss ratios are reported fire losses per \$100 of insurable value of property covered.

⁴ Oil stocks are included for 1934 and subsequent years.

⁵ Old basis: oil stocks not included for 1934 and prior years.

Authority: American Petroleum Institute.

U. S. OIL-LEASE RENTALS AND ROYALTIES PAID, BY SELECTED YEARS, 1923 TO 1949

Type of Payment	1949	1944	1940	1937	1923
Rents	\$110,000,000 ²	\$ 66,000,000 ³	\$ 51,300,000 ⁴	\$ 43,700,000 ⁵	\$ 12,300,000 ⁶
Royalties	668,440,000 ⁷	271,900,000 ⁸	186,300,000 ⁸	204,300,000 ⁸	122,300,000 ⁹
Total	\$778,440,000	\$337,900,000	\$237,600,000	\$248,000,000	\$134,600,000

² Calculated at 58 cents per acre on 190,000,000 acres under lease.

³ Calculated at 44 cents per acre on 150,000,000 acres under lease.

⁴ Calculated at 41 cents per acre on 125,000,000 acres under lease.

⁵ Calculated at 38 cents per acre on 115,000,000 acres under lease.

⁶ Calculated; equivalent to 2.4 cents per barrel of crude oil produced.

⁷ Calculated at 14.3 per cent of total value of crude oil produced.

⁸ Calculated at 13.5 per cent of total value of crude oil produced.

⁹ Calculated at 12.5 per cent of total value of crude oil produced.

Authority: Economics Department, The Atlantic Refining Co.

² Burma and Pakistan included with India in 1949.

³ Less than 500 bbl.

⁴ Present borders.

⁵ Estimated.

⁶ Includes a small production from Brunei.

⁷ Included in "other Europe."

⁸ Burma cannot be separated from India prior to 1934.

⁹ Less than 1,000 bbl.

¹⁰ Year ended Sept. 30.

¹¹ Production in previous years credited to Germany.

Authority: Bureau of Mines.

THE AMERICAN PETROLEUM INSTITUTE

The American Petroleum Institute is a trade association incorporated under the laws of the District of Columbia. Its objects, as stated in the charter, are:

To afford a means of cooperation with the government in all matters of national concern.

To foster foreign and domestic trade in American petroleum products.

To promote, in general, the interests of the petroleum industry in all its branches.

To promote the mutual improvement of its members and the study of the arts and sciences connected with the petroleum industry.

So many and varied are the Institute's activities that it is difficult to enumerate and to describe them. Briefly, they enter the fields of standardization, design, care, and good practice in the use of equipment; fundamental, technical, and medical research; safety and fire protection; waste disposal; testing methods and specifications; prevention of corrosion; collection and dissemination of petroleum information; pipe-line, highway, waterway, and railway transportation; petroleum statistics; public relations; measuring, sampling, and testing; employee training; economics; metallurgy; accounting; nomenclature; engineering; taxation; and agricultural services.

Major activities are indicated by the names of the four divisions, viz.: Division of Production, Division of Refining, Division of Marketing, and Division of Transportation; and of the three departments, viz.: Department of Technical Services, Department of Statistics, and Department of Information. The American Petroleum Industries Committee deals with taxation and legislation relating to distribution of petroleum products.

The work of the Institute is accomplished by committees of oil men working in and through the API divisions and departments. Thousands of oil men now are members of these Institute committees, and are contributing of their time and talents to promote the general welfare of the industry.

The Institute holds one annual meeting each year to review past developments and to consider the future. Mid-year meetings of the Divisions of Refining and Marketing are held, and the Division of Production holds spring meetings for each of its five districts. The annual meeting, held in the fall, is concerned with matters of broader interest.

Active management of the Institute's affairs is entrusted to the officers. The officers, elected annually by the Board of Directors, consist of a chairman of the board, a president, vice president for production, vice president for refining, vice president for marketing, vice president for transportation, treasurer, and a secretary and assistant treasurer. The president and the secretary and assistant treasurer are paid members of the staff. Other officers are honorary.

Policies are established by the Board of Directors, 116 members of which are elected to serve 2-year terms. The Executive Committee, composed of 7 of the elected officers and 30 members annually elected from the Board of Directors, exercises substantially all of the powers of the Board of Directors in the absence of action by the board.

The Institute maintains headquarters in Room 2040, RCA Building, 50 West 50th St., New York 20, N.Y. The New York offices provide headquarters for

the Division of Refining; the Departments of Statistics, Information, and Technical Services; and for the American Petroleum Industries Committee. Headquarters for the Division of Production are located in the Rio Grande National Building, Dallas 2, Texas. A statistical office is maintained at Los Angeles, Calif. The Institute has a Washington office, in which the Divisions of Marketing and Transportation are located at 1625 K St., N. W.

Members of the Institute are companies and individuals who have applied for membership; who have satisfactorily met requirements; and who have been elected in accordance with the by-laws.

Qualifications require that a company member shall have its principal office in the United States or Canada or Mexico. Individual members shall be residents of the United States, Canada, or Mexico; 21 years of age, or older; of high character and good standing; and having direct interest in the petroleum industry or any allied industry.

Oil men desirous of becoming members of the Institute may file an application at headquarters office, which promptly will refer the application to the Membership Committee for action.

OFFICERS AND DIRECTORS OF THE AMERICAN PETROLEUM INSTITUTE 1951

OFFICERS

Chairman of the Board.....W. Alton Jones.....Cities Service Co.....New York, N. Y.
President.....Frank M. Porter.....American Petroleum Institute..New York, N. Y.
Vice President (Production).....J. C. Donnell II.....The Ohio Oil Co.....Findlay, Ohio
Vice President (Refining).....W. L. Stewart, Jr.....Union Oil Co. of California..Los Angeles, Calif.
Vice President (Marketing).....Harry J. Kennedy.....Continental Oil Co.....Houston, Texas
Vice President (Transportation).....T. E. Swigart.....Shell Pipe Line Corp.....Houston, Texas
Treasurer.....B. Brewster Jennings..Socony-Vacuum Oil Co., Inc..New York, N. Y.
Secretary and Assistant Treasurer..Lacey Walker.....American Petroleum Institute..New York, N. Y.
